Marie Curie Integration Grants and Researchers' Night

Project Review Summary Report

Period covered: **Second**

Project ID of Marie Curie Re-/Integration Grant:

CIG

294183

Acronym: LSSvsCMB

Summary of project review:

The project as described in the interim report shows very good results in line with the original work plan! Delays in the JAST survey work package are due to technical problems out of control of the beneficiary. Small adjustments and rescheduling in the overall planning take care of this.

The scientific output in published form is excellent. Dissemination happened in the form of a large number peer reviewed journal consortium papers, invited and contributed conference and institute presentations by both the beneficiary as well as other group members. Public outreach was through talks and presentations.

The beneficiary is well integrated at the host and built up a group leading to quite fruitful training results. A permanent position as independent leader at CEFCA is a direct consequence of the experience gained during the re-integration activity.
